GradHack - Week 2 Pt.1: Explore

Agenda

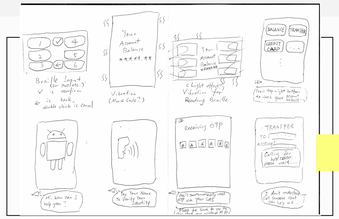
STEP 1
- Work on Crazy 8 Exercise individually.
- Post Crazy 8 illustrations into Mural.

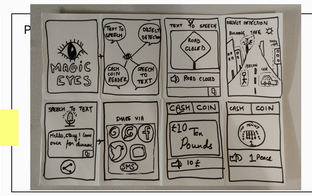
STEP 2
- Clean up your Crazy 8 and turn it into a 3 panel illustration that summarizes your solution.
- Post your solution onto Mural anonymously.
- Add notes around your idea to provide more context for your team (they will need to understand the solution at first glance).

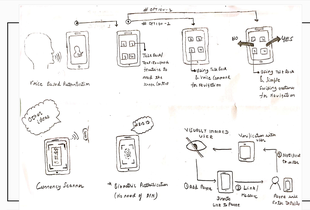
Step 1: Crazy 8's

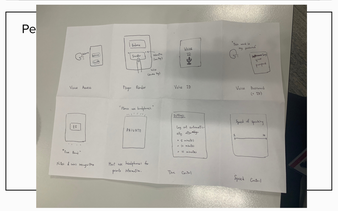
STEP 1
- Now that you have found a focus to solve for and have seen other examples from the Lightning Demos, we'll begin ideating.
- Crazy 8's is a quick exercise to get you to think beyond your first idea of a solution:

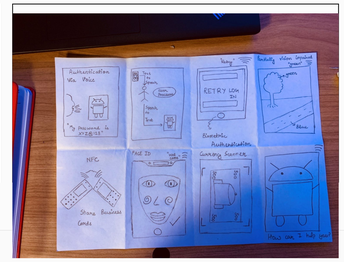
How to Perform a Crazy 8 Exercise:
> **Fold Paper into 8:** Fold a piece of paper 3 times to create 8 panels.
> **1 Minute Per Panel:** We encourage you to time yourself and spend 1 minute per panel.
> **Create Variations or New Solutions Per Panel:** As you draw you should be drawing a variation of your solution or another idea.
> **Post Crazy 8 Into Mural:** When you're finished with your 8 sketches, take a picture of it and post it in one of the boxes.







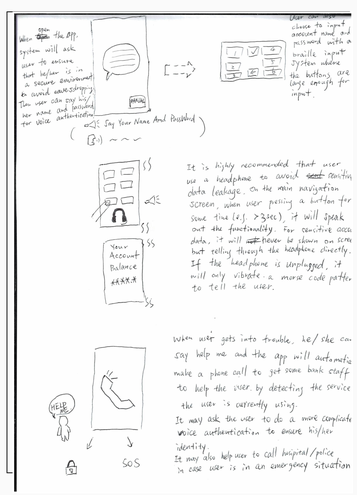




2 Step 2: Sketches 1

- Synthesize your drawings from your Crazy 8's and draw out the core objectives and features of your solution.
- You have 3 panels to illustrate your solution.
- We recommend you place a super cool title at the top to maintain anonymity.
- Feel free to add notes in the periphery of your sketch to give a bit more context of what each panel is but keep your notes to one sentence.

SOLUTION SKETCH 1
NO EAVESDROPPING



SOLUTION SKETCH 2
BLESSING IN DISGUISE
